BUILDINGS AND INTERIORS

**Perforated applications
and solutions**

Experience a quality partnership

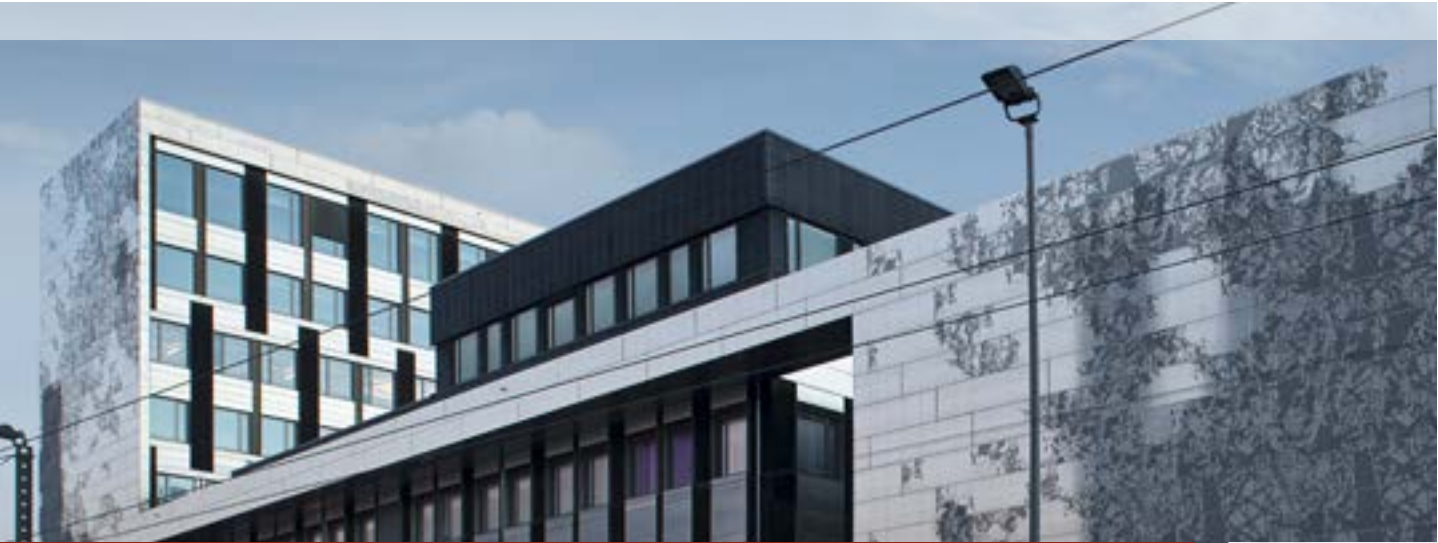

AS THE WORLD'S LARGEST MANUFACTURER AND SUPPLIER OF PERFORATED METAL PRODUCTS, RMIG OFFERS YOU A PROFESSIONAL PARTNERSHIP AND A WIDE RANGE OF OUTSTANDING PRODUCTS FOR BUILDINGS AND INTERIORS.

RMIG is a trusted and reliable partner for professionals within the building industry. We can deliver products and solutions on time and at competitive prices. Our many years of experience and extensive knowledge of the building industry enable us to assist you in the best possible way through the various stages of your project.

We use the latest technological manufacturing equipment to produce reliable and durable perforated products for small and large projects. You benefit from the high service level and expertise of our skilled sales personnel, who will assist you in finding the optimal solution to your needs.

RMIG: Just the facts

- Largest perforation company in the world
- Wide choice of tools for tailor-made solutions
- Own tool production and R & D department
- More than 1,000 different products in stock
- State of the art production facilities
- All manufacturing plants are ISO 9001:2008 certified
- Worldwide supplier of perforated metal products

RMIG City Emotion for unique design

PERFORATED AND EXPANDED METAL FOR INSTITUTIONS, OFFICE BUILDINGS, SCHOOLS, SHOPPING CENTRES AND MORE. RMIG CITY EMOTION IS AN INNOVATIVE AND EXCITING CHOICE FOR YOUR BUILDING PROJECT.

Are you the owner of a local metal fabrication shop and need a few sheets from stock to complete your latest construction job? We can help you find exactly what you need.

Or are you part of the design team for a large-scale architectural project? We can assist from start to finish – from the very first ideas on the drawing board to the manufacturing of the final product.

In either situation, the RMIG City Emotion concept offers a wide variety of solutions for buildings and interiors and you will benefit from collaborating with RMIG.

With RMIG City Emotion, you can utilise perforated and expanded metal to give your buildings and interiors a unique design. Our high quality products are versatile, durable and require minimum maintenance.

Among other applications, RMIG offers perforated sheets and expanded metal for:

- Facades
- Sun screens
- Balustrades
- Cladding
- Screening/fencing
- Ceilings

See more about the use of picture perforation for above listed applications on page 11.

Facades

VERSATILE FACADES IN PERFORATED AND EXPANDED METAL.

RMIG can help you implement your building project. Whether it is a perforated, embossed or indented facade or a combination, we can assist you. Our skilled technical personnel are ready to assist with design input and suggestions based on your specific needs. We create drawings of the sheets for your approval before production. In addition, we can manufacture the sheets for your facade sequentially and number the individual sheets, which is beneficial when installing sheets on a large facade project.

Your advantages

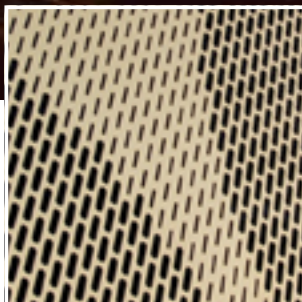

Not only do we perforate, we also offer to cut, bend, shape and take responsibility for the all-important finishes. We can deliver the flat perforated sheets directly to you, or if desired, also take care of secondary operations, for example:

- Cutting
- Bending
- Bolt holes, corner notching
- Levelling, rolling and forming
- Welding
- Surface treatment (galvanising, anodising, painting etc.)

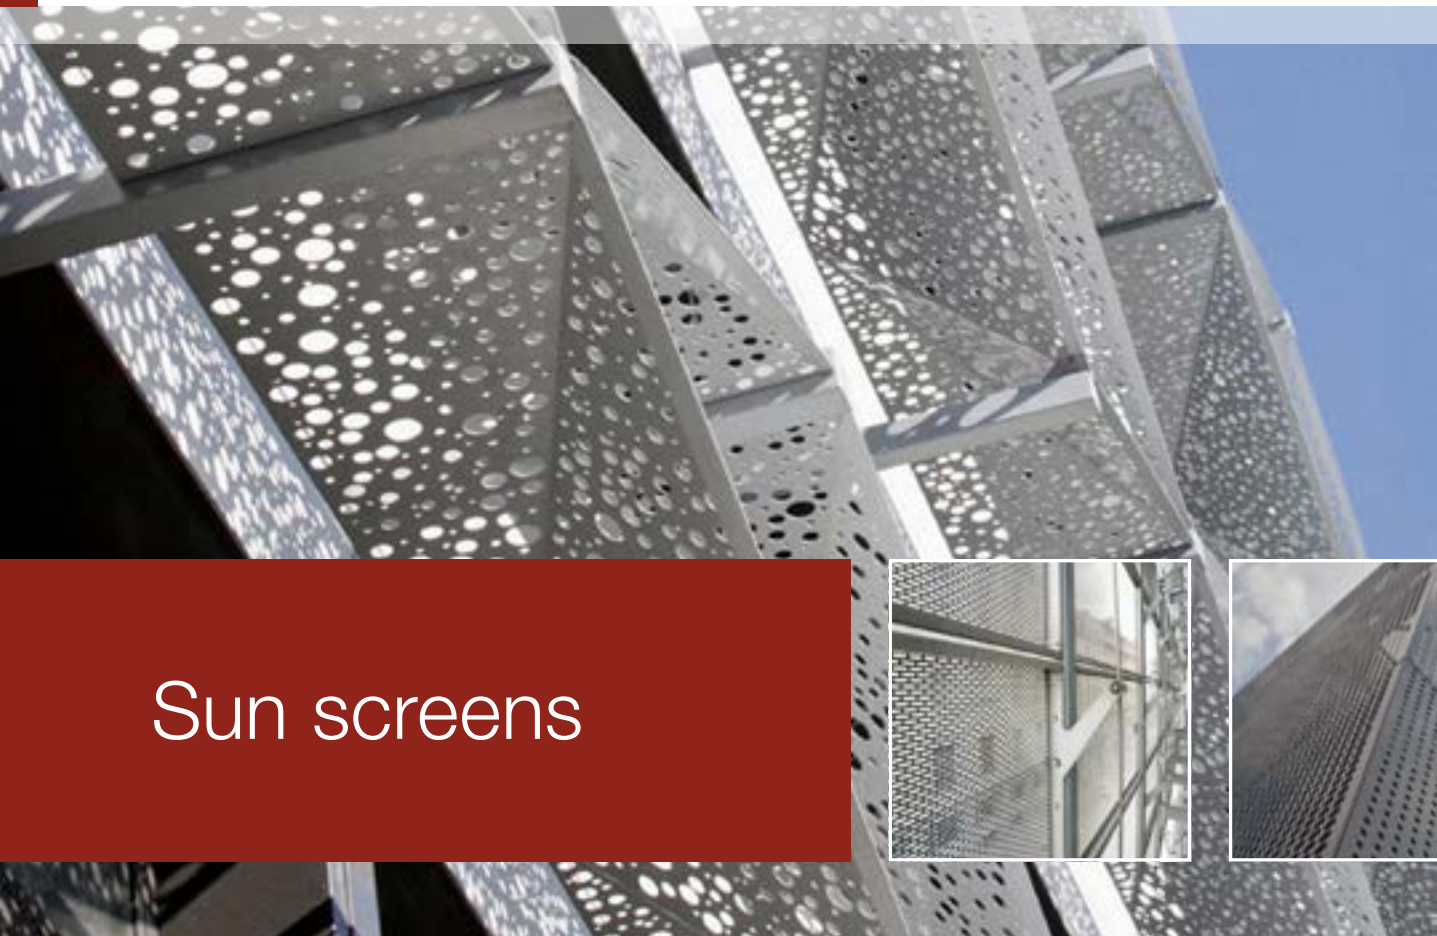

If needed, we can offer to deliver a mock-up for approval. Furthermore, we know how important it is that your facade sheets reach you in good condition and we are experienced in packaging products to avoid damage during transport.

If adjustments or modifications are needed during the project, we are flexible and happy to accommodate the necessary changes.

Sun screens

SUN SCREENS WITH A GREEN PROFILE.

With the increasing costs of energy, it is more important than ever to focus on sustainable building design and finding the best way to regulate the temperature and climate conditions inside buildings. Whether it is for a new build project or the refurbishment of an existing building, sun screens in perforated or expanded metal are made from sustainable materials and provide an environmentally friendly solution that can help reduce the need for ventilation and cooling, thereby decreasing the energy consumption.

Perforated sun screens

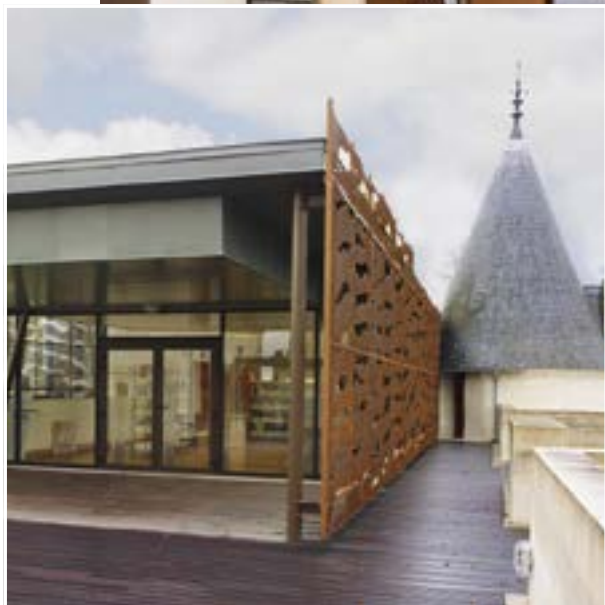

Perforated sun screens have the advantage of providing privacy without blocking the view. They also allow a good amount of natural light into a building during daylight hours.

The RMIG City Emotion product range comprises a large number of patterns and screen solutions for you to choose from when selecting your perforated sun screens. Whether you need a single screen or thousands of square metres, we can offer you individual solutions adapted to your specific requirements.

A place in the sun

Punctual delivery, competitive prices and a unique knowledge of perforated sheets for sun screens. With RMIG City Emotion, you benefit from the reliability of a large supplier and freedom of choice in patterns, materials, sheet sizes and secondary operations.

Balustrades

SIMPLE OR COMPLEX – WE HAVE THE SOLUTION.

Whether you are working on a large or small project, our vast range of products makes it possible for us to find the best possible solution for you. At RMIG, you have the freedom of choice when it comes to perforated sheets for staircases, balconies or railings and also when selecting the preferred material, whether it is mild steel, aluminium, stainless steel, brass or other materials. Tell us about your requirements and we will find the best possible solution to your needs.

Tailor-made perforated balustrades

In addition to perforating the sheets according to your design, we can provide bending, forming and bolt holes, and what we have started, we are happy to finish for you in the form of natural finishing, powder coating, galvanising or anodising.

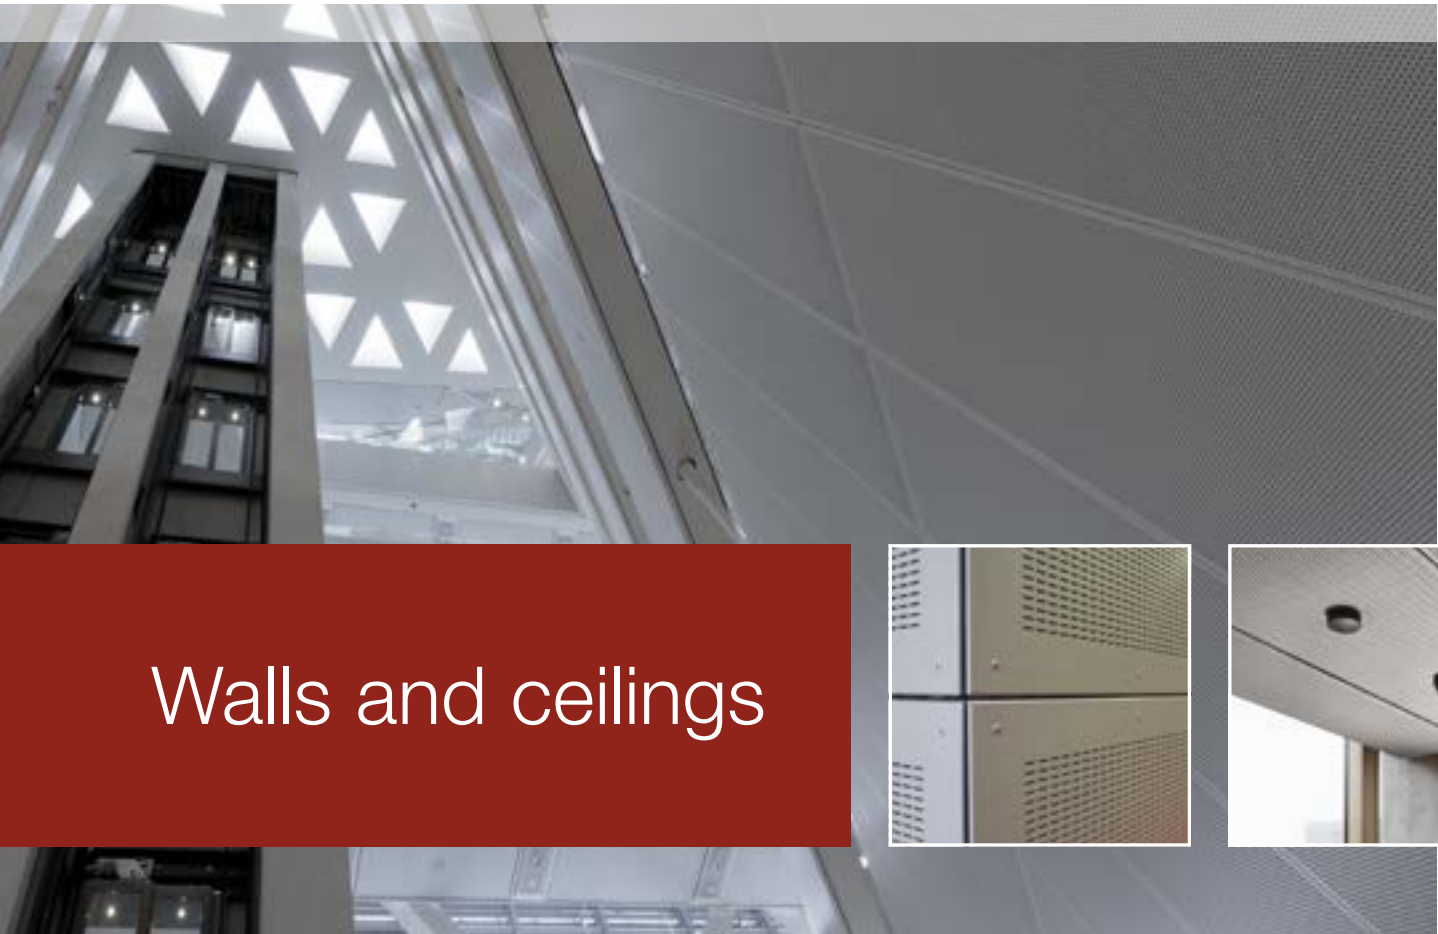

Perforated sheets from stock

At RMIG, you find one of the world's largest selections of perforated metal sheets in stock ready for use – also for balustrades.

As well as perforated sheets and expanded metal, we can also offer frame profiles from stock. By fitting a frame profile around a cut standard perforated or expanded metal sheet, you create a smooth edge and make it stronger, safer and suitable for balustrades.

Elegant examples

Visit our homepage and find a broad selection of case studies where architects, contractors and metal specialists have chosen products and solutions from RMIG City Emotion. See more at www.city-emotion.com.

Walls and ceilings

DISCOVER A WORLD OF INTERIOR PRODUCTS AND SOLUTIONS.

With perforated sheets from RMIG used for walls or ceilings, it is possible to combine aesthetic considerations with the need for optimal sound conditions. RMIG has a range of perforating patterns that have been developed to provide architects with design solutions to improve sound absorption and enhance the visual appearance of a wall or ceiling. However, if you cannot find the exact pattern you are looking for, we can manufacture tooling to meet your specific requirements.

Walls in all sizes

Are you looking for...

- individual metal cladding for smaller areas?
- sound absorbing partitions and notice boards?
- functional, sound absorbing and large-scale cladding of walls?

Perforated metal panels clad with sound cloth can be the optimal solution to serve as effective sound absorbers, thus creating a good working environment.

Ceilings

With RMIG City Emotion, perforated steel, stainless steel and aluminium ceiling tiles can be supplied with both functional and aesthetic performance criteria for ceilings in new or refurbished buildings.

Your advantages

- Flexibility – from small to large projects
- Metal products delivered for you to finish
- Finished cassettes including sound cloth for you to install
- Numbering of the individual sheets for easy mounting
- Individual solutions customised according to your needs
- Possibility of ordering mock-up for approval

Screening and fencing

THERE IS NO LIMIT FOR RELEVANT USE OF PERFORATION AND EXPANDED METAL IN AND AROUND BUILDINGS.

Fences and screens in perforated and expanded metal can be used advantageously for a wide variety of purposes. For example, if you want a solid and secure solution for shielding an area or if you want to make a bicycle shelter that lasts for years, perforated metal is the obvious choice in these and many other cases.

Just imagine...

Perforated and expanded metal is the optimal solution for bicycle shelters, garbage bin enclosures, shopping trolley parking, shielding of large installations, bus shelters and similar applications. It gives protective covering, hides installations, helps reduce vandalism and yet lets light and ventilation through. It is safe, practical and durable.

Solutions according to your needs

- Sheets delivered for you to finish
- Finished elements, ready for you to install
- From small orders to large contracts
- Simple solutions – order from our stock
- Complex tailor-made solutions specially designed for you

Contact RMIG and let us help you to find the optimal solution to your needs.

Graphic and image perforation

ILLUSTRATIVE PICTURE PERFORATION FOR FACADES, BALUSTRADES AND CLADDING.

The perforation of graphics and images provides an original and individual boost for residential, public and commercial buildings. We can transfer images or patterns of your choice and use them on most of the applications within the RMIG City Emotion programme.

First-hand experience with picture perforation

RMIG has already delivered perforated solutions utilising picture perforation to a vast number of projects all over Europe and therefore has extensive experience with the best methods to use on such projects.

We know that picture perforation is a field that requires technical expertise as well as close collaboration with all parties involved. The individual numbering of perforated sheets is of great importance for easy installation and we are happy to offer you this essential service. In addition, we also create drawings of the sheets for your approval before production.

Be creative

Make creativity an essential part of your project. With RMIG City Emotion, you can set the bar for innovative and exciting building design even higher. We look forward to helping you achieve the best results possible.

MARKET LEADER

RMIG is the world's largest supplier of perforated metal. We offer an extensive range of perforated stock sheets as well as tailor-made solutions. All our manufacturing plants in Europe have a common quality management system based on the ISO 9001:2008 standard. Take advantage of our more than 100 years of experience and let us help you achieve the best possible results for your project with our high quality perforation products.
