

Picture perforation with a global view

THE FACTS BEHIND A 'STAR' ATTRACTION...

For Nordstjerneskolen in Denmark, RMIG has manufactured and supplied high quality perforated sheets to create a unique facade.

- Raw material: Mild steel
- Thickness: 2.0 mm
- Pattern: RMIG ImagePerf
- Surface treatment: Hot dip galvanising
- Architects: ARKINORD A/S and Arkitema Architects
- Picture perforation design: Art Spot

WITH ITS UNIQUE STAR-SHAPED BUILDING, NORDSTJERNESKOLEN BREAKS AWAY FROM THE TRADITIONAL ARCHITECTURE FOR SCHOOLS, CREATING AN ATMOSPHERE CONDUCIVE TO BOTH LEARNING AND ADVENTURE

When designing Nordstjerneskolens in Frederikshavn, the architects from ARKINORD A/S and Arkitema Architects wanted to create an atmosphere where teaching, learning and social activities could be combined. The unusual star-shaped construction of the school building provides the perfect solution. Each point of the star houses two grades and the centre of the star has become the heart of the school where all age groups can meet to interact and inspire.

When manufacturing the sheets for the facade, RMIG's expertise and experience with picture perforation made it possible to turn the design

from artspot.dk into stunning images at each of the 5 "points" of the star, with facades depicting various scenes from around the globe – from a city skyline to a savannah, from the woods to the pyramids.

Decorative and durable facade

The choice of galvanised steel is well-suited to the maritime atmosphere of the town. The use of high quality materials provides long-lasting solutions and with focus on sustainability and cost effectiveness, RMIG has supplied a durable and virtually maintenance-free facade that can be enjoyed by both pupils and teachers for many years to come.

MORE THAN JUST BUILDINGS

RMIG City Emotion is for everyone who values the beautiful and innovative qualities of our cities, because a city is not just about buildings. A city is a place for emotion and it requires our full attention to unleash its aesthetic appeal.

RMIG City Emotion captures the passion for creative urban design by offering innovative technologies and materials. We can help you realise the most ambitious architectural projects and their emotional potential.

- Let us guide you through the benefits and practicality of your design
- We can work on your drawings in CAD, 2D and 3D formats
- Use perforated sheets, embossed sheets or expanded metal
- Enjoy the unique finishing operations and surface treatments

RMIG is the world's largest manufacturer and supplier of perforated metal. In addition to exterior cladding, the company also supplies products for a large number of construction applications such as car park and security screening, acoustic wall linings, ceilings, lighting, street furniture, balustrades and walkways.
